3P Rainus

3P Technik

Item #2000700 Gray
Item #2000790 Brown

This Small Filter is placed in the downspout to remove particles and debris from water collected from roof tops. Rainwater Filter for installation in the lower section of the downspout. It is easy to monitor due to its installation position in the downspout. No need to lift heavy lids or to climb down into storage tanks, as required when filters are installed underground. The downspout filter where the cleaned rainwater flows out down the filter pipe. Simple installation and maintenance depending on contamination. To clean, slide the filter unit out, and brush off any dirt.

Food grade high quality polyethylene construction.

Cleaned water can be used in washing machines, toilet flushing and garden watering, in homes, in commerce, in public buildings and in industry.

Low maintenance, due to the self cleaning design.

Works well as a pre-filter for a rainwater harvest tank.
